ALPA of Switzerland

Website Solutions Guide - Biography

We would be pleased to publish your photographic work in a more personal way in the „Solutions“ section (as well as „Gallery“) on www.alpa.ch. This section brings together information about the photographer (Biography & Work), his/her personal photography (Gallery/Galleries) and the ALPA equipment used for the photographic field of activity. The pictures might be spread over several entries in the „Solutions“ section.

It would be great to get the following information for one or more entries (the more complete the better ☺):

1. Portrait of the photographer/the photographers (minimum 800x800 pixels)
2. Biography and personal work
3. Pictures for the gallery/galleries with technical basics if possible (minimum 800x800 pixels, you can use a table like below or the Excel-Spreadsheet for specifying/listing the pictures)

Biography and Personal Work
